

SCOTT M. NYGREN

SENIOR BUSINESS SYSTEMS ANALYST | FINANCIAL REPORTING DATA ANALYST

Denver, CO | 720-530-8292 | scott@snygren.com | [linkedin.com/in/scottmnygren](https://www.linkedin.com/in/scottmnygren)

PROFESSIONAL SUMMARY

Senior Business and Data Analyst with 20+ years of experience turning complex enterprise data into actionable insights, validated reporting, and delivery-ready product requirements. Proven ability to partner with Product, Finance, Operations, Technology, QA, and senior stakeholders; lead discovery and intake; define KPIs, business rules, data mappings, acceptance criteria, and test scenarios; and guide initiatives from concept through implementation. Advanced SQL and analytics background with hands-on experience in dashboards, data quality, reconciliation, trend analysis, and issue investigation. Well positioned to support product-usage analytics, AI-enabled insight generation, natural-language query capabilities, and high-visibility enablement processes.

CORE QUALIFICATIONS

Product Ownership & BA: Discovery, intake, prioritization, epics, user stories, acceptance criteria, backlog refinement

Data Analysis & Validation: SQL analysis, profiling, reconciliation, anomaly detection, root-cause analysis, data-quality controls

Analytics & Reporting: KPI definition, dashboard requirements, management reporting, trend and variance analysis

Stakeholder Partnership: Executive communication, workshops, cross-functional alignment, issue escalation, decision support

AI & Enablement: AI-assisted analytics, natural-language query use cases, evaluation criteria, workflow and process enablement

Delivery & Testing: Agile/Waterfall SDLC, UAT, test scenarios, defect triage, release readiness, production stabilization

TECHNICAL & DOMAIN SKILLS

Platforms & Data: SQL, PL/SQL, T-SQL, Oracle 11g-19c, SQL Server, Snowflake, Teradata, Ab Initio, Collibra, XML, JSON

Delivery & Modeling: Jira, Confluence, Azure DevOps, HP ALM/Quality Center, BPMN, UML, data modeling, data-flow analysis, Agile and Waterfall SDLC

Financial Systems: OFSAA, QRM, Hyperion, Essbase, OBIEE, FIS-ACBS, Misys Loan IQ, AFS Level III, AxiomSL ControllerView

Reporting & Analytics: Power BI, Tableau, SSRS, SSIS, SAP BusinessObjects/Crystal Reports, Cognos, NetSuite

AI-Relevant Capabilities: AI workflow definition, analytics use-case design, evaluation criteria, natural-language query concepts, pattern and anomaly investigation

KEY ACHIEVEMENTS

- Interpreted FR 2052a and LCR requirements and translated them into business rules, data mappings, validations, controls, acceptance criteria, and test scenarios for liquidity-reporting automation.
- Improved finance and management-reporting reconciliation processes by 20%, increasing transparency and confidence in reported results.
- Reduced manual regulatory-reporting processing time by 23% through automation and process redesign while maintaining controlled, on-time delivery.
- Implemented a global data-governance program 15% under budget and raised measured data quality from 86.3% to 99.2%.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Finance - DePaul University, Chicago, IL

Risk Management & Structured Finance Program - University of California, Berkeley

CBIIPro, Basel III Certified Professional - Compliance Professional Association

CDMP, Certified Data Management Professional - DAMA International

PROFESSIONAL EXPERIENCE

IDB BANK, New York, NY | Senior Financial Systems Analyst

08/2023 - 01/2024

- Led business analysis for the Orion Data Warehouse and FP&A/OFSAA replacement initiatives, partnering with Finance, Product, Technology, and reporting stakeholders to define requirements, data flows, controls, and implementation priorities.
- Facilitated requirements discovery, documented functional specifications and source-to-target mappings, coordinated testing, and supported issue resolution through implementation and production stabilization.
- Improved reconciliation processes by 20%, strengthening accuracy, transparency, and confidence in finance and management-reporting outputs.

BNY MELLON, New York, NY | Senior Technical Business Analyst

09/2021 - 07/2023

- Spearheaded business analysis for Collaborative Balance Sheet Planning within Corporate Treasury, supporting enterprise forecasting, liquidity, ALM, FTP, NII, and strategic balance-sheet decision making.
- Translated complex treasury workflows and stakeholder needs into requirements, user stories, process flows, data rules, test scenarios, and delivery-ready documentation for QRM and connected financial platforms.
- Provided direction during Agile delivery, clarified requirements for developers and QA, coordinated UAT, assessed risks and dependencies, and drove resolution of cross-functional issues.

WELLS FARGO N.A., Denver, CO | Senior Business Systems Consultant

07/2019 - 08/2021

- Managed AFS Data Management and Data Insight Transformation initiatives, acting as the bridge among commercial lending, operations, data, technology, and program stakeholders.
- Led discovery and analysis of business processes, application functionality, data requirements, integrations, controls, and reporting needs; produced requirements, mappings, process documentation, and implementation guidance.
- Directed infrastructure and analysis initiatives that improved enterprise data utilization by 30%, while proactively managing issues, dependencies, stakeholder alignment, and delivery risk.

CREDERE GROUP, Denver, CO | Business / Regulatory Reporting Analyst

08/2017 - 06/2019

- Led analysis for regulatory-reporting automation and liquidity-monitoring solutions supporting Corporate Controllers, Treasury, Risk, Technology, and regulatory stakeholders.
- Interpreted LCR and FR 2052a requirements; defined business rules, data mappings, validations, controls, acceptance criteria, and testing approaches for complex cash-flow and liquidity-reporting processes.
- Reduced manual processing time by 23% through automation and process redesign while maintaining controlled, on-time delivery to regulatory agencies.

MUFG AMERICAS, San Francisco, CA | Senior Business Systems Analyst

10/2014 - 06/2017

- Served as Financial Reporting Data Steward for Risk Technology and Data Management, leading analysis of reporting requirements, data lineage, controls, data quality, and remediation priorities.
- Supported Advanced Approaches IRB and Basel initiatives by translating regulatory and business needs into technical requirements, data definitions, mappings, test cases, and governance documentation.
- Collaborated across globally distributed business and technology teams, constructively challenging assumptions and providing evidence-based recommendations.
